BEFORE YOU GO....CHECKLIST

Control Humidity and Temperature

- **Set the thermostat:** Keep it around 82°F with a humidity control feature to prevent mold.
- **Use dehumidifiers:** Place dehumidifiers or moisture-absorbing products around the house.
- **Run ceiling fans:** Set them to a low speed to maintain air circulation.
- **Turn off the water supply:** Prevent potential leaks or flooding.
- **Unplug appliances:** This protects them from power surges and reduces energy consumption.

Clean out your pantry and donate.

Are you leaving for the season and have a pantry full of non-perishable, unopened items that will not be fresh next January. Please consider delivering those items to our local food banks and organizations dedicated to addressing food insecurity. Please give them a call or visit their websites to get drop-off information. **ONLY unopened, non-perishable, not expired.**
